
7afe Ecu Pinout Pdf Download

April 12, 2009 - I have 2 engine control units, one for auto and one for manual transmission, and both have the same connector diagram: [26P] [16P] [22P] + [56P] + [23P] (only the TCM is different from the ECU, it has 5 pins: [22P] [56P] [56P] [56P] [56P]) On the ECU block, I have 8 contacts, plus one common output, which always has voltage: And yet, these contacts are not entirely clear to me (there may be more and more of them, but so far I have seen their display in the harness): Question: which of these blocks should stand exactly? (I have both). And how do I know which block will stand? Actually, not quite so.
