UltraSentry Crack + Activation Key

UltraSentry is an advanced software program that is specialized in protecting sensitive files, permanently deleting data, locking files, as well as securely cleaning your browser's history. Clean feature skeleton The application reveals a well-structured suite of features. You are given access to an Explorer-like panel that allows you to browse throughout the content of files and folders stored in your computer. It takes simple drag-and-drop actions in order to lock or delete files securely from your system so they cannot be recovered using third-party specialized tools. A comprehensive help manual is available online, in case you need extra assistance with the configuration process. Aside from the main interface which helps you remove or lock items, you may rely on a small panel that resides on your screen. It can be docked so it does not occupy too much space on the desktop. The minimalist window helps you encrypt or shred files using drag-and-drop actions. General configuration settings The place where the encrypted files are stored is called 'Digital Locker.' It is password-protected so other users cannot gain access to your private information. You may also decrypt files on the go and employ batch actions for shredding multiple

files/folders at the same time. You can integrate the tool within your Windows Explorer and Recycle Bin for fast deletion tasks, automatically clean data when you close the current web browser, run the utility at Windows startup, set up custom security deletion algorithms with certain number of passes, and ask for password in order to access the Digital Locker. Tests have pointed out that UltraSentry carries out a task quickly. It is quite friendly with system resources so the overall performance of the system is not affected. Support for several profiles A smart feature included in the package enables you to work with several preset profiles in order to automate several actions, such as securely delete your browser's history, cache, autocomplete data, and unwanted cookies, and look for and permanently destroy the contents of the 'User' folder that tracks Internet usage and other habits. You are also offered the freedom to create your own profile. You may select the web browsers (Internet Explorer, Firefox, Chrome, Safari, Opera) for cleaning and remove temporary files (e.g. system temporary items, Recycle Bin data, download directories), user's files and directories (e.g. My Favorites, My Pictures, My Music), history files (e.g. search history, 09e8f5149f
