Winged Sakura: Endless Dream combines the traditional dating simulation genre with the story genre, and is focused on serious dating rather than on a playfulness to keep the player from getting annoyed and keep them interested in the date. The "feel-good" aspect of the game requires the player to think about what they want and want to do at the current time, but not so serious that they get too nervous around girls. The main character is a 31-year-old man named Raki who was dumped by his girlfriend after falling in love. A girl named Serah appears in front of him and gives him a birthday present. She tells him that she will allow him to date her if he successfully completes a dungeon located within the game. In the end, he successfully dates Serah and falls in love with her. Dates will be given at random times and places, such as near night and day, and the beginning will be in town. The player can talk with girls during the day, but not at night. When the player is talking, a time bar starts to fill up, so the conversation should be kept short. There are 16 types of dates available with different quality levels in exchange for dates, experience, and points. The player can save the conversation for a later date if they wish to improve their conversation skills. When the time comes to talk to girls after you have had the date, your conversation skills will gradually increase, and the quality of the conversation will be improved by 1 level. Conversation skills must be higher in order to talk to girls later. After talking to a girl, if the conversation was poor, you can speak again, but the quality of conversation will be degraded. There are two types of girls in the game: "Mother" and "Sister." The "Mother" type is generally found in the west side of the map, while the "Sister" type is found in the east side. The Mother type is generally short-tempered and talks in a rough way. On the other hand, the Sister type is generally sweet and friendly. When you start talking to girls, the date will go well until the date ends, after which it will go well until the date ends. If the date ends without the end condition, there will be a problem, and the player will have to return to the date screen to change the date. To date with girls, you will need to do battle after talking to girls, perform a quiz, and unlock the dungeon. If you manage to

We would like to create and release a new game, so we decided to bring the action of Winged Sakura: Mindy's Arc to the next level. Using the artwork of Winged Sakura: Mindy's Arc, we have created a new action adventure game. The scenario is set from the beginning of the story of Winged Sakura: Mindy's Arc, where protagonist Mindy Miller, after her mission, came to the home of Aiko, and received a order from the Inverse. Gameplay and scenario are all new, but we have kept Mindy's arc-relevant characters in the game. We sincerely hope you enjoy the new games. **Sakura is a lovely spring flower with her long green and pointed leaves. She is a symbol of achievement and victory. And yet it is the buta that give the biggest honour to these flowers. Buta are small bells and they are awarded only to someone who has done something special. They are usually awarded as a gift on the 3 year anniversary of marriage. Despite their small size, these bells ring out like a trumpet for decades after death. In this world of endless dreams, the memory of these bells is but a distant dim hope for the lives of Tsukiyomi and Kagura. Sakura may have been giving them her bells but she has been going through a deeply troubled past filled with betrayal and untimely deaths. Now these two share Sakura's past. And even though the ancientst of this world has left them behind, Sakura is holding an identity for both of them. Her relationships with both of them take on their own meaning. One is of a troubled past that leads a youthful Kagura to hope for a better world. The other is of a troubled past that leads a young Tsukiyomi to understand just exactly what kind of person Kagura is. Character Design Such a small bell with so many uses. Like the many elegant lockets used as a jewelry in the new age. Create a player character (PC). As system suggested, make a middle-aged or older man (since he is assigned as the PC), he looks like he has been into a brawl. And the kit for the custom character is - Level 2 Custom Character Skill - Level 2 Unwieldy Tool (Great Weapon and Cavalry) - Level 2 Unwieldy Armor and Shield, and Level 1 Chance of Panicked Transfer - Enhanced Level 2 Training via user equipments [The escapades is a skill that allows you to transfer all of your training points to a weapon] - Level 1 Kit Ebay Purchase By the way, this version only has unenhanced skills, and there is no more easily Enhanced Level 2 Training via user equipments [The escapades only for other skilled characters]. I recommend - Level 2 Unwieldy Armor and Shield - it's free from the kit, and we do not need any money to buy it - Level 3 Chance of Protracted Transfer - Enhanced Level 3 Training via user equipments - is not available**
