And I don't want any bug on my PC.Please Download,Install and use it. Thank you!..Q: Finding the distribution of the max {X,Y} I want to find the distribution of $M = \max(X, Y)$. Knowing $M = x_1 + x_2$. What would be the joint distribution of X, Y? A: One way to look at your problem is to consider a simpler model with two independent geometric random variables $X,Y\sim\operatorname{Geo}(p)$. Then, we can calculate that M is the sum of two such independent random variables, and this gives us $$ M=X+Y\sim\operatorname{Geo}(p+p)=\operatorname{Geo}(2p). $$ The fact that the sum of two independent random variables is again a random variable gives us $$ M=X+Y\,\,\,\sim\,\,\,\operatorname{Bin}(2,p+p/2)=\operatorname{Bin}(4,p). $$ We can also write this as $$ M=X+Y=\begin{cases} X,&\text{with probability }p+p/2,\\ Y,&\text{with probability }p+p/2. \end{cases} $$ Image in medicine {#sec1} ================= Nail patella syndrome is a rare autosomal recessive disorder of connective tissue. At first it was just a button that functioned as a tic-tac-toe game. But I'm trying to make it so you can put anything in the first position, anything in the second, and so on. I know what I need to do to fix the errors, I just don't know what those are.
