

side of the pane, you can see some information about the used hot keys. The History pane allows you to go back to previous hot key states. == ShowVLC Usage: 1. You have to launch ShowVLC in the same window as VLC. You can do that by either double-clicking on the VLC icon, or pressing Command-space, typing ShowVLC and pressing enter. 2. The key combination that you set in ShowVLC is now the hot key for launching VLC. 3. To stop the application, press Command-q. To run it again, choose ShowVLC from the menu bar, and press Command-space. If the default hot key for the VLC process does not work, try something else. 4. You can use ShowVLC to capture any player information. It can show the main window size, window title, window status (showing VLC process running, playing 2edc1e01e8
